

## **More Sex Differences in Lucid Dreaming Frequency**

**Dr. S. J. Blackmore**

*Department of Anatomy, The Medical School, University of Bristol, England*

“I noted the discussion of sex differences in the Letter. In my study with Amsterdam students I found no age differences but those who claimed to have lucid dreams were more often male ( $X^2 = 4.19$ , 1 df  $p < .05$ ).”
