

## News and Notes

### Books:

My book Lucid Dreams (1968) is now distributed in the USA and Canada by State Mutual book and Periodical Service Ltd., 521 Fifth Avenue, New York, NY 10017, USA.

My colleague Charles McCreery's book Psychical Phenomena and the Physical World which also deals extensively with lucid dreams is likewise distributed by State Mutual, along with the rest of the Institute's books.

We have had a number of letters from individuals in the USA over the years since Lucid Dreams was first published complaining of difficulty in obtaining the book in your country, so I thought your readers might be interested to know that State Mutual are now able and willing to fulfill orders, whether from libraries or individuals. The price of the book is \$18.95, not including postage and packing, and it is preferable if individuals include payment with their order.

If any of your readers would like further particulars of all our publications, a number of which deal directly or indirectly with the subject of lucid dreaming, we should be pleased for them to write to us.
